Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 60, subpart A), as well as for the specific requirements at 40 CFR part 60, subpart Dc. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Owners or operators of small industrial-commercial-institutional steam generators with maximum design heat input capacity of 29 megawatts (MW) or less, but greater than or equal to 2.9 MW.

Respondent's obligation to respond: Mandatory (40 CFR Part 60, Subpart Dc).

Estimated number of respondents: 323 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 219,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$38,300,000 (per year), which includes \$12,600,000 in annualized capital/setup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent burden and O&M cost from the most-recently approved ICR due to an increase in the number of respondents.

This ICR assumes an industry growth rate of 11 respondents per year, or an increase of 33 respondents, since the last ICR renewal period, which results in an increase in burden and the number of responses submitted. The industry growth also results in an increase in O&M costs.

This ICR also maintains a continuous growth rate of 11 respondents per year over the next three years. Because the number of new sources anticipated over the next three years has not changed, there is no increase in the anticipated capital costs reflected in this ICR.

Director,

Regulatory Support Division.
